

Majestic Meadows Dairy

Sheboygan Falls, WI

"I love the light in the barn. It's more uniform and really improves our working conditions. I can see the cows much better."

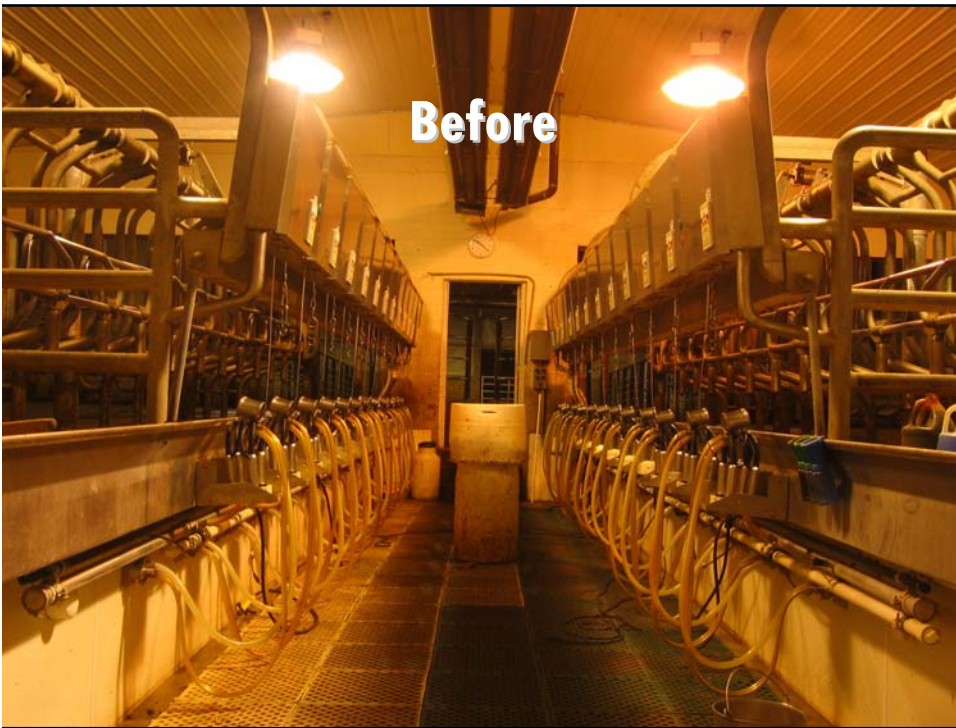

- Dean Strauss, Part Owner

BarnLiter™
Long Day Lighting System

Based on published research from UW-Madison dairy scientists, the proper use of long day lighting can easily yield an additional 5 lbs. of milk per cow each day.* That translates into an additional net income of \$100 per cow each year.

*Results may vary depending on herd management.

Majestic Meadows Dairy

“The milkers can see much better in the parlor. Not only is there a lot more light, but there is better light and fewer shadows.”

-Dean Strauss, Part Owner

This parlor was retrofitted using the BarnLiter Long Day Lighting System. We replaced four HID fixtures with four BarnLiter fixtures to achieve these superior results.

Brightness: In the parlor overall

Before - 7.0 fc
After - 13.9 fc

99% Increase

In the pit

Before - 8.8 fc
After - 21.3 fc

142% Increase
