

UNITED HOG SYSTEMS

Marshall, Missouri

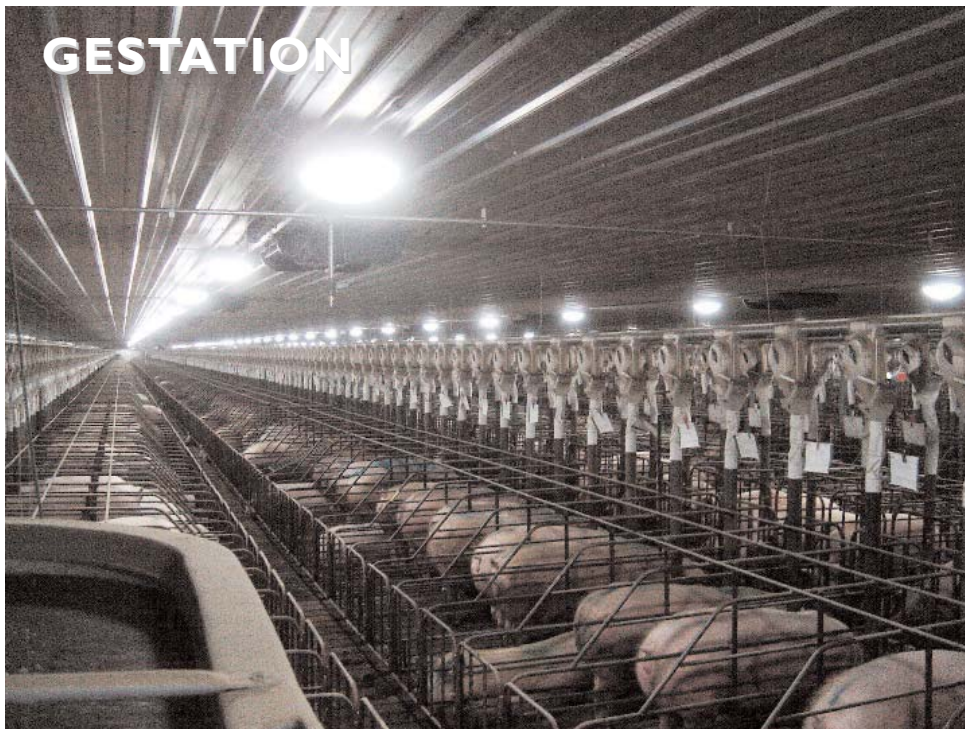

“At this time, we are using Orion lights exclusively in new construction of our farms.”

*-David Stephens, General Manager
(seen at far left in picture)*

This confinement building features Orion’s OW36 hardwire fixture, which puts out twice the light of a 100-watt incandescent light bulb but uses just one-third the energy. That’s 36 watts vs. 100 watts.

The crew at United Hog enjoy the great performance of their Orion lights in hallways (as shown above), and also in gestation barns and farrowing rooms (see reverse).

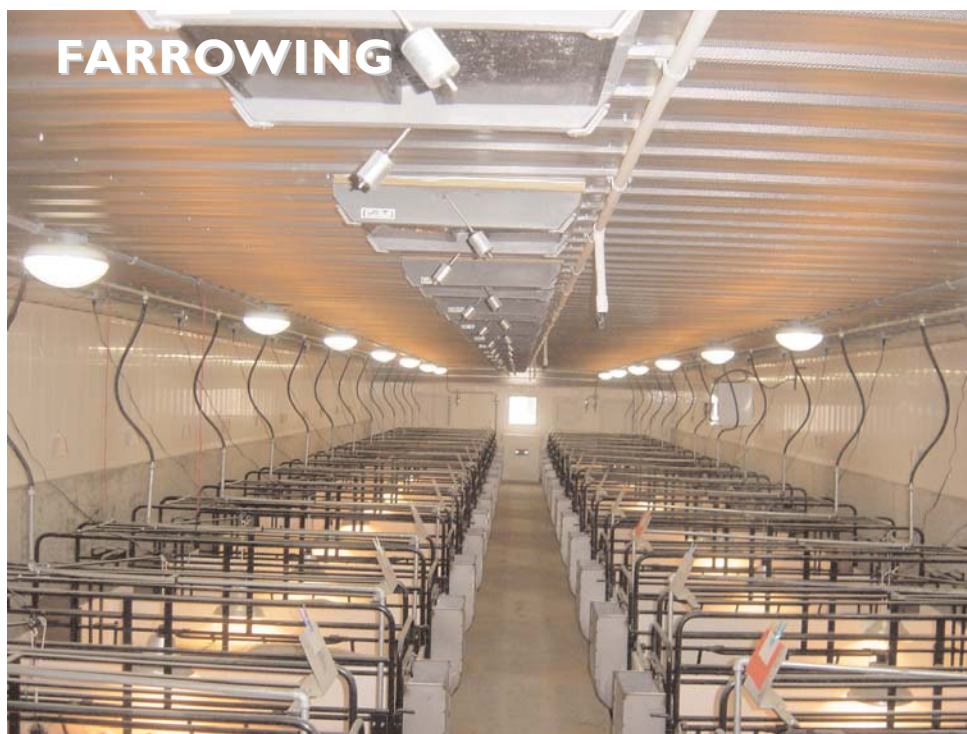

UNITED HOG SYSTEMS

Marshall, Missouri

“In the spring of 2003, we replaced a good number of old lights with the Orion light fixtures. All unit managers have been happy with the lighting and performance of the lights.”

-David Stephens, General Manager
